QUALITY AND FEED SAFETY POLICY

SOLIMIX, as a company dedicated to providing handling, mixing, and packaging services for both chemical products and additives and premixes for animal feed on behalf of other companies, is fully aware of the need and importance of ensuring a robust quality and feed safety management system within our organization.

Through this policy, and by communicating it at all levels of the organization, we clearly express our intention to comply with the requirements of the management system and to continually improve its effectiveness.

To this end, at SOLIMIX we commit to:

- Produce legal and safe additives and premixes for animal feed, taking into account the Approval Letter granted by FAMI-QS.

- Always meet the requirements established by our clients and other interested parties, as well as applicable regulatory requirements, in the most efficient manner possible.

- Manage human, material, and economic resources within a continuous improvement process that allows us to consistently achieve greater management efficiency.

- Maintain sufficient flexibility and agility to adapt to customer requirements in a dynamic, changing, and competitive environment.

- Promote quality and feed safety management among all involved personnel, at all levels, and in all company processes.

- Promote and maintain proper training and information to raise awareness among all staff about the need to carry out their work with full quality and safety guarantees.

- Continuously improve the effectiveness of the quality and feed safety management system.

- Implement food fraud prevention and food defense measures.

To achieve this policy, Management sets feasible goals and objectives, reviews them periodically, monitors them through indicators, and develops appropriate planning to meet them.

This quality and feed safety policy will be reviewed annually, communicated to all staff, and made available to interested parties.

Antón Onieva Sánchez
